Handbook RE-5 - Building and Site Security Requirements

Build Security In was a collaborative effort that provided practices, tools, guidelines, rules, principles, and other resources that software developers, architects, and security practitioners can use to build security into software in every phase of its development.

Build Security In | CISA

A security operations center (SOC) is a centralized unit that deals with security issues on an organizational and technical level. A SOC within a building or facility is a central location from where staff supervises the site, using data processing technology. Typically, a SOC is equipped for access monitoring, and controlling of lighting, alarms, and vehicle barriers.

Security operations center - Wikipedia

Buy the book! Building Security In... Beginning where the best-selling book Building Secure Software left off, Software Security teaches you how to put software security into practice. The software security best practices, or touchpoints, described in this book have their basis in good software engineering and involve explicitly pondering security throughout the software development lifecycle.
