present when physical signs and changes in laboratory values suggest tissue hypoperfusion. This article in the Critical Care Medicine series reviews the diagnosis and treatment...

## **Circulatory Shock | NEJM**

Causes of cardiogenic shock include heart attack and other heart problems, problems outside of the heart,

# Access Free Circulatory Shock Research Topics

and medicines or procedures. A heart attack is the most common cause because it can damage the heart's structure in different ways. Less often, a problem elsewhere in the body blocks blood flow coming into or out of the heart and leads to cardiogenic shock.

## **Cardiogenic Shock | NHLBI, NIH**

Neurogenic Shock.

# Access Free Circulatory Shock Research Topics

Neurogenic shock is a type of distributive shock, consisting of the hemodynamic triad of hypotension, bradycardia, and peripheral vasodilatation, attributed to severe central nervous system damage (head trauma, cervical cord trauma, or high thoracic cord injuries), resulting in loss of sympathetic stimulation to the blood vessels and

## The Heart and Circulatory System.

The heart is one big pump made of muscle fibres. Its job is to circulate blood around body so that oxygen and nutrients can be delivered to cells, carbon dioxide can be removed and infections fought. A healthy adult heart beats about 60-80 times per minute. Children's heartbeats are faster, around 100-120 bpm.
