Cold Smoking Salt Curing Meat

Dry-cured meats and cold smoking has been my passion for a few decades, it's quite the obsession! Recently, I came back from a very long overseas trip across Italy (3 months, 5 months in other places) I had all my chattels/gear in storage. But I wanted to do some dry curing and cold smoking to make a little bit of bacon as a gift for a friend.

How to Cold Smoke Meat: The Basics - American Grit

Cold smoking dates to very primitive days, when meats were hung to dry in environments smokey from constantly smoldering fires. Not only did the accidentally cured meat keep much longer than dried strips, it tasted better. Compared to hot smoked food, cold smoking does not cook food.

An Intro To Cold Smoking Meat - Grill Master University

Dry curing pork (feral or otherwise) is the easiest and most popular method of curing. Once you've trimmed up your ham, weigh it to know how much salt you'll need. Morton salt company recommends ¾ ounce of their Sugar Cure product for each pound of pork. Do your math, weigh out the necessary cure salt, then divide the salt into thirds.

Survival Skills: How to Use Salt and Smoke to Cure Meat ...

The process of curing is simply using the benefits of salt to preserve meat. Before refrigeration was available, curing was just about the only way to save up meat in warm weather months. Without salt, bacteria would grow in and on the meat and quickly cause it to go bad.

Preserving Meat Long-Term, The Old-Fashioned Way - Off The ...

At its most basic, to cure is simply to preserve in salt. In the days before refrigeration, curing meat and fish in salt was practically the only way to preserve those foods. Left to their own devices, bacteria contained within meat or fish will cause it to spoil and rot.

Preserving Meat By Curing and Smoking | Peak Prosperity

“Cold Smoking” is done over a much longer period of time, e.g. 12-24 hours, over a smoldering fire (below 85°F). Since foods are held in the temperature danger zone, rapid microbial growth (40-140°F) could occur. Therefore, only those meat products that have been fermented, salted, or cured, should be cold-smoked.

Meat must be fresh prior to applying any preservation method. Curing should not be used to salvage meat that has excessive bacterial growth or spoilage (PHS/FDA 2001). Meat, especially game meat, does not need to be aged, since curing/smoking will act to tenderize it. If aging is desired, age all meats below 40°F.

Curing and Smoking Meats for Home Food Preservation

To cold smoke meat, the basic process is as follows: The meat goes through a curing process to extract moisture and inhibit bacterial growth. The cured meat is exposed to smoke, which imparts the distinctive smoky flavor. Smoking the meat takes time, from hours to days, depending on the product.

Guide to Cold Smoking - Smoked BBQ Source

Curing meat is also an essential step for hot smoking and you can opt for a dry cure or a wet cure (brine). Dry curing implies sprinkling the salt, sugar, and spices directly on the meat and refrigerate it for a minimum amount of time. For a brine cure, one should mix salt, sugar, and spices into the water.

Smoking Meat For Long-term Storage - Smoking Secrets For ...

Cold-smoking involves keeping the pork's temperature below 110 degrees Fahrenheit, generally in a range of 80 degrees to 100 degrees. To dry the meat as part of a traditional cold-smoke cure requires at least 15 hours of smoking, and can take much longer, depending on the pork's weight, the amount of fat and the desired color.
