The field or meadow wildflower garden is different from woodland wildflower gardens. It is composed of a wide range of plants that flower in full sun or must have at least six hours of full sun each day to grow and flower well. Soils for these plants can generally be less fertile and lower in organic matter.

Wildflowers in the Home Landscape | MU Extension

Look for the showy white flower clusters of smooth beard-tongue in Missouri's prairies, moist alluvial woodlands, roadsides and fallow fields throughout most of the state. In cultivation the species needs sun to partial shade and moist soil. It can grow to 4 feet in height with many stems.

Wildflowers -- identification guide -- Discover Life

Buttercups abound in the national parks of Missouri as bright yellow wildflowers with a cone in the center. It usually has five petals that may also be white with a red, pink or purple flush as the petals reach the center of the flower.

10 Missouri Wildflowers You Will Only See in Springtime

About Wildflowers, Grasses and Other Nonwoody Plants in Missouri A very simple way of thinking about the green world is to divide the vascular plants into two groups: woody and nonwoody (or herbaceous). But this is an artificial division; many plant families include some species that are woody and some that are not.
