I have a 92 dodge Dakota it will not start whatsoever. My coolant hose had a hole in it, so it was overheating. The day after the coolant hose got a hole in it I started it and it started I then replaced the coolant hose and it won't start at all. It will turn over but won't fire, the spark plugs are sparking and I can smell gas which means the fuel injectors are working.

2009, it was marketed by Dodge. The first Dakota was introduced in late 1986 as a 1987 model. The Dakota was nominated for the North American Truck of the Year award for 2000.

Dodge Dakota - Wikipedia

Chrysler used the "magnum" call on their as much as date 5.2L (318 c.i.) engines to tell apart a clean turning element interior the engine layout. there has been 2 such variations. initially there replaced into the A 318 block which if i'm not fallacious used polyspherical combustion chambers. next replaced into the 318LA this is a wedge-head version that weighs much less.

how can i get more horsepower out of my 92 dodge dakota ...

Somewhere between 1991 and 1992, the Dodge Dakota woke up believing it was a Mustang. As if adding a V8 engine in 1991 wasn't enough, the Dodge Dakota delivered even more power in 1992. A re-engineered fuel injection system gave the 3.9-liter engine an incredible boost of horsepower from 125 to 180 (that is not a typo), which is more than the 1991 V8 even rated.
