The rectum is a hollow muscular tube about 8 inches (20 cm) in length and 2½ inches in diameter at its widest point. It extends from the inferior end of the sigmoid colon along the anterior surface of the sacrum and coccyx in the posterior of the pelvic cavity. At its inferior end, the rectum tapers slightly before ending at the anus.

Rectum function. The rectum is usually empty and the anal sphincters contracted. When feces are squeezed into the rectum by mass peristaltic movements, the stretching of the rectal wall initiates the defecation reflex, which account for the urge to defecate that is often felt soon after a meal (Figure 3).
