Retirement Planning in 6 Easy Steps | The Motley Fool

Multiply by 25. Multiply the amount you need each year in retirement by 25. This is how large your portfolio should be, assuming you have no other sources of retirement income. If you want to live on \$40,000 per year, for example, you'll need a \$1 million portfolio (\$40,000 x 25).

Retirement Planning in 6 Easy Steps - The Balance

Many large employers offer pension plans for their employees. The amount of pension that the employee can collect depends on the number of years that they have worked for the company. The amount of money that is paid into the pension each month will also make a difference in how much money can be received upon retirement. Just like balance transfer credit cards, it may be possible to transfer ...
