Guided by the precept that to understand any phenomenon well, it is necessary to start by looking at it in broad, nonspecialized terms, Robert A Stebbins takes the reader through the process of exploratory research in an easy-to-read style providing the student or researcher with a complete reference for carrying out this type of research.

Exploratory Research in the Social Sciences by Robert A ...

Research designs for exploratory work usually depend on direct observation of a small selection of what is to be studied, for example, drinking behavior. Focus groups that bring together a small group of subjects to participate in a guided dialogue with regards to a limited issue, are a good example of exploratory research design.
