Pro/ENGINEER Using Family Tables and Patterns

The "Offset Parameter" is the angle between the halves of the hinge. This is a dimension that was created in the hinge assembly. When assembling the 2nd half of the hinge you need to align the axis, the ends of the halves and a angular alignment mate the two sides, this is set to be an angle that is set, and in the main assembly shown is made flexible to allow for the hinge to show correctly ...

"The most exciting thing is that we can now create, in a virtual way, almost all of the mandatory aspects of our products," says Leo Greene, vice president of engineering. One of the company's products is called the JetBoard. Although the design began manually, the company was able to make the jump to fully-digital definition via Pro/Engineer.
