MICHAEL STUBBS Abstract This article illustrates a method of studying the evaluative connotations of words and phrases, by studying their most frequent collocates in large corpora. The semantic schemas which can be identified in this way are clusters of preferred lexis and syntax, which often have conventional prag-matic connotations.

Using recurrent phrases as text-type discriminators

Michael Stubbs. Words and Phrases: Corpus Studies in Lexical Semantics. 2001. Oxford: Blackwell. Pp. xix, 267. This book deals with the most neglected aspect of current modern linguistics, in my view, viz. lexis B words and their connotations, incorporating traditional lexical semantics, including lexical fields, sense relations, and collocations.

Michael Stubbs. Words and Phrases: Corpus Studies in ...

Michael Stubbs University of Trier, Germany ABSTRACT Corpus studies have shown that words in texts have two strong tendencies: they occur in clusters and they occur in partly fixed phrases. These features have text-management and evaluative functions, and therefore provide the basis of a theory of how lexis contributes to textual organization.
