The global ocean - the Earth's oceanic waters, including the Arctic, Atlantic, Indian, Pacific and Southern oceans - supplies more than half the oxygen we breathe, and provides food and livelihoods for billions of people worldwide. It is also home to a wondrous array of wild species, from tiny plankton to the biggest creature that's ever existed - the blue whale.

Ocean | WWF - Panda

Ocean for Life is an international ocean science and cultural exchange program created to inspire a more peaceful world, dawning from the tragic events of September 11, 2001. This unique program brings together high school students of diverse

backgrounds to foster cross-cultural relationships, explore marine science, and develop a stewardship ethic for the ocean.

Welcome to Oceans Fresh Food Market

Many countries can't afford to grow chickens and meat, so they rely on fish for their protein needs. Ocean fishing accounts for 80% of the world fish catch. The other 20% comes from inland fishing (5%) and aquaculture (15%). 95% of all ocean catches occurs in coastal waters. 1/4 to 1/3 of the world's ocean fish catch is used to feed animals.
