### Schema Therapy Questionnaire

Schema therapy (ST) is an integrative approach that brings together elements from cognitive behavioral therapy, attachment and object relations theories, and Gestalt and experiential therapies. It was introduced by Jeff Young in 1990 and has been developed and refined since then.

### Schema Modes Therapy Exercises & Worksheets | Psychology Tools

The order in which schemas are clustered on the questionnaire corresponds to their listing on the Schema Grid. Scores for each schema are found by counting the total number of items within each schema rated either 5 or 6. This number is then entered and graphed in the corresponding row on the Schema Grid.

undergoes cognitive-behavioral therapy for his obsessive-compulsive disorder. Some cognitive-behavioral therapists have adapted these protocols to work with difficult patients in ways that are consistent with schema therapy (c.f. Beck, Freeman, & Associates, 1990). We discuss some of these modifications later in this chapter (see pp. 48-53).

**SCHEMA THERAPY: CONCEPTUAL MODEL**

The Young Schema Questionnaire (YSQ) assesses which of the Early Maladaptive Schemas a patient probably has. The YSQ has both a long form and a short form. Many people have written us asking about the relative advantages and disadvantages of the two versions. There are two main advantages of the long form.

**Specific Inventories - Schema therapy**

Schema therapy was developed by Jeffrey E. Young for use in treatment of personality disorders and chronic DSM Axis I disorders, such as when patients fail to respond or relapse after having been through other therapies (for example, traditional cognitive behavioral therapy). Schema therapy is an integrative psychotherapy combining theory and techniques from previously existing therapies ...

**Lifetraps test - test your lifetraps - test your schemas ...**

The Schema Therapy model proposes that early maladaptive schemas develop through an interaction between temperament and adverse childhood experiences where specific, core emotional needs are not met. In other words, early life experiences foster the acquisition of schemas or self-defeating patterns of interaction with the world.
