Tessellation gallery: Animals - Nicolas
Tessellations are patterns made from repeated designs that cover an area leaving no gaps between them. Tessellations are often used to teach symmetry, geometry and other lessons to children in grades 3-7. Possibly because of the age bracket, animals are among the most common nongeometric subjects to tesselate.

How to Create Animal Tessellations | Our Pastimes
'Two Birds' was created in 1938 by M.C. Escher in Op Art style. Find more prominent pieces of tessellation at Wikiart.org – best visual art database.

Tessellation Animals | 50 ideas on Pinterest ...

Animals with irregular backs, like camels, or necks, like giraffes, may be easier to tessellate. Another solution is to use mammals that are curled up or resting, providing smoother edges to work with. In a pinch you can interweave the legs of two rows of mammals by turning one row upside down.

The honeycombs of the bees, the fish scales or the sunflowers give us some fine examples of tessellations but it is especially the crystals that nature offers us to show us the way. We find in their structure the 17 symmetry groups allowing to repeat a pattern at infinity.

Tessellation method accessible to all: Free online - Nicolas

The artist M. C. Escher is famous for making tessellations with irregular interlocking tiles, shaped like animals and other natural objects. If suitable contrasting colours are chosen for the tiles of differing shape, striking patterns are formed, and these can be used to decorate physical surfaces such as church floors.

Tessellations here mean symmetric designs featuring animals, toasters, persons, etc, which can fit together in repetitive patterns like simple jigsaw puzzles. These fill a surface, usually a 2D plane, without gaps or overlaps. Brick walls, tiled floors, and the honeycomb in bee hives are all tessellations.

Tessellations - M. C. Escher and how to make your own ...

Tessellations. A tessellation is a covering of the plane by shapes,

called tiles, so that there are no empty spaces and no overlapped tiles.Tessellations are also called tilings.. Some tessellations involve many types of tiles, but the most interesting tessellations use only one or a few different tiles to fill the plane.

Introduction to Tessellations - EscherMath
A tessellation is defined as a geometric shape that can be arranged in a repeating pattern with no space between the shapes and no overlapping. I think they are fascinating!
