Science of Deduction | Generation Zero Wiki | Fandom
Deductive reasoning, also deductive logic, is the process of reasoning from one or more statements to reach a logically certain conclusion. Deductive reasoning goes in the same direction as that of the conditionals, and links premises with conclusions. If all premises are true, the terms are clear, and the rules of deductive logic are followed, then the conclusion reached is necessarily true. Deductive reasoning contrasts with inductive reasoning in the following way; in deductive reasoning, a c
